NICK PETERSON

Full Stack Developer

@ nick@livelyapps.com https://github.com/nickpeterson

EXPERIENCE

Full Stack Developer

Lively Apps

April 2020 – Ongoing Vancouver, BC

- Full stack development on apps currently available on the Atlassian marketplace for Confluence and Jira
- Worked on development projects using modern frontend web tools with Java Spring, AWS, and Node for backend services
- Participated in code reviews, debugged problems and corrected issues.
- Managed releases from initial steps through final delivery.
- Solved support tickets, interacting directly with customers.

Teaching Assistant

University of British Columbia

Jan – Aug 2020 Vancouver, BC

- Taught Java language, design principles, and design patterns
- Assisted students in the design and development of personal projects.
- Graded assignments, quizzes and exams.

Software Quality Assurance Intern

Garmin

Sep – Dec 2019 Cochrane, AB

- Authored and maintained well-organized, efficient and successful manual test cases for entire team.
- Designed and built internal tools used to automate testing processes.
- Wrote and reviewed documentation for internal tools.
- Debugged code and located root causes of problems by reviewing configuration files and logs.

SKILLS

Javascript | CSS/SCSS | HTML | Java | Python | Go | SQL

Spring | React | Express | Apache Velocity | Webpack | JDBC | Hibernate | Liquibase

Agile | Version Control (Git) | Product Marketing | Product Documentation

PROJECTS

Codegeist 2020 2nd Place
My development team received 2nd place in the 2020 Codegeist competition for the Lively Recorder for Confluence cloud. The Lively Recorder is now available on the Atlassian Marketplace.

Atlassian Marketplace Apps
I have contributed to several apps available on the Atlassian Marketplace. The on-premise apps use Java Spring framework backend with scss, handlebars, velocity, and Javascript ES6 on the frontend. Our cloud apps use popular frontend frameworks such as React and backend AWS infrastructure such as lambda, S3, elastic beanstalk, amazon RDS for Postgres, and DynamoDB.

Tele-Vet
(React, Node, Express, Material UI, MongoDB)
An app that connects pet owners to vets in a remote setting.

Sprint Planner
(React, Java, Postgres, Flyway, JDBC, Maven)
https://github.com/nicklpeterson/SprintPlanner
A simple kanban board for planning sprints.

Ear Bender
(Java, Maven)
A Domain Specific Language for creating music witten in Java. Uses the visitor pattern for verification and compilation.

Code Journey
(Node, React, D3.js, Express)
Render call tree representations of javascript functions.

EDUCATION

Bachelor of Computer Science

University of British Columbia

Sept 2018 – May 2021

B.S. Mathematics & B.A. Economics

University of Minnesota Duluth

Sept 2011 – May 2015

Magna Cum Laude
Department Honors (Economics)
