EXPERIENCE

Full Stack Developer

Lively Apps

April 2020 – Ongoing Vancouver, BC

- Full stack development on apps currently available on the Atlassian marketplace for Confluence and Jira
- Worked on development projects using modern frontend web tools and spring framework for Java for backend services
- Reviewed code, debugged problems and corrected issues.
- Managed releases from initial steps through final delivery.

Teaching Assistant

University of British Columbia

Jan – Aug 2020 Vancouver, BC

- Taught Java language, design principles, and design patterns
- Assisted students in the design and development of personal projects.
- Graded assignments, quizzes and exams.

Software Quality Assurance Intern

Garmin

Sep – Dec 2019 Cochrane, AB

- Authored and maintained well-organized, efficient and successful manual test cases for entire team.
- Designed and built internal tools used to automate testing processes.
- Wrote and reviewed documentation for internal tools.
- Debugged code and located root causes of problems by reviewing configuration files and logs.

PROJECTS

Codegeist 2020 2nd Place
My development team received 2nd place in the 2020 Codegeist competition for the Lively Recorder for Confluence cloud. The Lively Recorder is now available on the Atlassian Marketplace.

Atlassian Marketplace Apps
I have contributed to several cloud and on premise apps currently available on the Atlassian Marketplace. The on-premise apps are built on a Java Spring framework backend with scss, handlebars, velocity, and Javascript ES6 on the frontend. Our cloud apps use popular frontend frameworks such as React and backend AWS infrastructure such as lambda, S3, elastic beanstalk, amazon RDS for Postgres, and DynamoDB.

Tele-Vet
(React, Node, Express, Material UI, MongoDB)
An app that connects pet owners to vets in a remote setting.

Sprint Planner
(React, Java, Postgres, Flyway, JDBC, Maven)
https://github.com/nicklpeterson/SprintPlanner
A simple kanban board for planning sprints.

Ear Bender
(Java, Maven)
A Domain Specific Language for creating music witten in Java. Uses the visitor pattern for verification and compilation.

Code Journey
(Node, React, D3.js, Express)
An app that renders a call tree representation of simple javascript programs.

SKILLS

Javascript | CSS/SCSS | HTML | Java | Python | C/C++ | SQL

Spring | React | Express | Apache Velocity

Agile | Version Control (Git) | Product Marketing | Product Documentation

Intentional Communication | Team Leadership

EDUCATION

Bachelor of Computer Science

University of British Columbia

Sept 2018 – May 2021

B.S. Mathematics & B.A. Economics

University of Minnesota

Sept 2011 – May 2015

Magna Cum Laude
Department Honors (Economics)
